AI engineer (IIT Madras BS in Data Science and Applications, final year; B.Sc. completed 2026) who builds and ships AI systems end to end: multi-agent workflows in LangGraph, RAG, MCP tools, LLM evaluation, deep learning for vision and medical imaging, and voice AI, served through FastAPI and Next.js with Docker and CI/CD. Former founding data scientist at Trackleo Technologies, where I helped launch the company's first AI platform in under three months. Seeking a remote AI/ML engineering role.

Core Competencies

- **LLM & Agentic AI**: LangGraph multi-agent orchestration with human-in-the-loop checkpoints, LangChain, RAG with FAISS/ChromaDB/Qdrant, MCP tool building, OpenAI, Anthropic Claude and Gemini APIs, structured outputs, prompt engineering.
- **LLM Evaluation**: DeepEval (faithfulness, relevancy, bias, toxicity), Ragas, Promptfoo, LiteLLM multi-provider benchmarking, Elo arena ranking, prompt regression tests.
- **Machine Learning & Deep Learning**: Python, scikit-learn, XGBoost, TensorFlow/Keras (CNN, ResNet50 transfer learning), PyTorch, YOLO + ByteTrack, OpenCV, Whisper ASR, feature engineering, model evaluation.
- **MLOps & Cloud**: MLflow, DVC, Feast, Docker, Kubernetes, GitHub Actions CI/CD, GCP Vertex AI, AWS, Databricks, Prometheus/Grafana.
- **Backend & Full-Stack**: FastAPI, Flask, PostgreSQL, Redis, Celery, SQLAlchemy, WebSockets, Next.js, React, TypeScript, React Native/Expo, Supabase.

Professional Experience

Trackleo Technologies Pvt. Ltd. **Chennai, India**
Data Scientist *Feb 2026 - Jul 2026*

- Engineered a deep learning fundus image classifier for five retinal disease classes.
- Partnered with the CEO to launch the company's first AI-powered web platform in under three months.
- Owned model experimentation, deployment workflows and platform integration across two core AI initiatives.
- Used Python, SQL, FastAPI, Docker, MLflow, CI/CD and Kubernetes in production model deployment.

AtliQ Technologies **Remote**
Virtual Data Scientist Intern *Dec 2025 - Jan 2026*

- Built a CNN and ResNet50 fruit freshness classifier (8 fruit types) with 99.8% validation accuracy, served via Streamlit.
- Automated manual inspection, reducing evaluation time from hours to minutes (estimated 80% productivity gain).

Sudha Gopalakrishnan Brain Centre, IIT Madras **Chennai, India**
AI LLM Intern *Nov 2025*

- Built 11 MCP tools in Python for 3D Slicer, enabling natural-language brain MRI visualization and analysis.
- Cut scan viewing, navigation and analysis time by an estimated 60%, using headless automation, Docker and FastAPI.

Web Karo India **Remote**
AI Product Engineering Intern *Jan 2025 - Sep 2025*

- Architected an AI collaborative productivity platform (Kanban, calendar, notes, whiteboard, AI assistants, voice commands); estimated 35% task-efficiency gain.
- Delivered ML pipelines, backend services, API integrations and automation features.

Selected Projects

ShelfScan (so-app)
IIT Madras Nirmaan pre-incubated, funded startup project *Jul 2026 - Present*
Scan-and-go supermarket checkout (rack QR, cart, Razorpay exit QR). Built the app with Expo/React Native, TypeScript, Supabase (Postgres RLS, OTP auth, edge functions), Jest and CI.

Data Firefighter **GitHub**
LangGraph, FastAPI, Next.js, DataHub
11-node LangGraph agent that traces a schema change's blast radius through DataHub lineage, finds the root cause and opens a GitHub remediation PR after human approval.

Butterfly Director AI **GitHub**
LangGraph, FastAPI, PostgreSQL, Celery, Redis, Docker
11 specialised agents turn one story premise into branching generated short films, using Qwen, Wan and CosyVoice models on Alibaba Cloud, with CI and async workers.

LLM Evaluation Platform **GitHub**
DeepEval, LiteLLM, FastAPI, Celery, Next.js
Multi-provider LLM benchmarking with faithfulness/bias/toxicity metrics, prompt regression tests and a blind Elo arena; Prometheus + Grafana monitoring.

Long-Video Activity Detection **GitHub**
PyTorch, YOLO11n, ByteTrack, OpenCV
Detects and localises 10 activity classes in long CCTV video with a tracking-plus-rule-engine branch and an appearance branch; measured results and live demo.

EchoFlow **GitHub**
FastAPI, WebSockets, Next.js, Gemini/OpenAI
Low-latency voice-to-voice assistant with VAD, a conversation state machine and a pluggable STT, LLM and TTS pipeline.

Education

Indian Institute of Technology (IIT) Madras **Chennai, India**
BS in Data Science and Applications (4-year, final year) *Sep 2023 - Expected 2027*
Machine learning, deep learning, statistics, programming, software engineering and MLOps (DVC, Feast, MLflow, Kubernetes, Vertex AI; MLOps project scored 100/100). B.Sc. degree completed in May 2026 after three years; now in the fourth (BS) year. Includes Diplomas in Programming and in Data Science.

Awards & Certifications

- **S grade** (highest, 10/10) at IIT Madras in Machine Learning Practice (MLP) and Modern Application Development I and II (MAD-1, MAD-2).
- **100/100** on the IIT Madras MLOps weekly assignment project (Vertex AI, DVC, Feast, MLflow, Kubernetes).
- **Certifications**: Diploma in Programming, Diploma in Data Science, and Advanced Certificate in Machine Learning & Data Science (IIT Madras); SQL for Data Science and Math & Statistics for AI and Data Science (Codebasics).

Languages

- English (fluent, full professional proficiency), Hindi (native).
