

Abhishek Jha

+91 8287706259 | abhijha8287@gmail.com | New Delhi, Delhi | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

Passionate about Machine Learning, Deep Learning (ANN, CNN, RNN, GRU) and web development with strong skills in building AI-driven applications. Pursuing B.S. in Data Science and Applications at IIT Madras, with a keen interest in data analysis, model development, and real-world AI solutions.

Education

Indian Institute of Technology, Madras Bachelor of Science - Data Science and Applications	Chennai, Tamil Nadu Sep 2023 - Present
--	--

Key Skills

Programming Languages: Python, SQL, Java Script, HTML5, CSS3

AI/ML Libraries: Scikit-learn, XGBoost, Hugging Face, Pandas, NumPy, Matplotlib, Seaborn, Plotly

AI/ML Frameworks: TensorFlow, Keras, PyTorch, LangChain, LangGraph, CrewAI, VectorDB

NLP Frameworks & Libraries: NLP, Text-Processing, Hugging Face, LangChain

Web Dev Frameworks:Vue JS, Streamlit, Flask Fast api, Mern Stack, Next JS

Tools: OpenAI API, Jupyter Notebook, Google Colab, VS Code, Git, Github, Docker, FastAPI,AWS, Postman, PostgreSQL

ML Deployment & MLOps : Model Deployment, Model Versioning, Model Monitoring, CI/CD Pipelines, Docker, Kubernetes, Kubeflow, MLflow, DVC, RESTful API Deployment.

Professional Experience

Trackleo Technologies Pvt. Ltd. Data Scientist	Hybrid Feb 2026 – Present
Working on healthcare AI solutions using fundus eye image and echocardiography (Echo) datasets. Developed and evaluated machine learning and deep learning models for Five-class retinal disease classification, performed medical image preprocessing, feature engineering, model optimization, and data analysis. Contributed to predictive modeling and computer vision pipelines for automated disease detection and clinical decision support systems. Skills: Data Science, Machine Learning, Deep Learning, Computer Vision, Medical Imaging, Python, Data Analysis, Predictive Modeling, SQL, Visualization.	
AtliQ Technology Data Scientist (Internship)	Virtual Dec 2025 – Jan 2026
Gained hands-on experience with data cleaning, visualization, and predictive modeling as part of the virtual internship projects. Skills: Data Analysis, Machine Learning, Deep Learning, GenAI, NLP, Agentic AI.	
Sudha Gopalakrishnan Brain Centre (SGBC) AI Developer (Internship)	IIT Madras — Chennai Nov 2025
Designed end-to-end medical imaging systems including patient dashboards (PDF comparison, MRI/segmentation visualization, 3D scan exploration), headless 3D Slicer pipelines (Windows, Docker, Jupyter), and MCP-based automation integrated with Claude Desktop, along with pure-Python Docker workflows for volume processing, visualization, and segmentation without external dependencies. Skills: Medical Imaging, 3D Slicer, Headless Automation, Python, Docker, MCP Servers, Jupyter, Visualization, System Integration, GenAI Tools, Web Development, Fastapi.	
Web Karo India AI Product Engineering Intern	Remote Apr 2025 – Sep 2025
Led AI product engineering initiatives focused on developing intelligent product features and integrating AI/ML capabilities into web platforms. Worked on scalable solutions that improved product functionality and operational efficiency. Skills: AI Product Engineering, Python, Machine Learning, Web Development, API Integration, Automation.	
Web Karo India AI Product Engineering Intern	Remote Jan 2025 – Mar 2025
Contributed to AI-driven product development by building and testing intelligent features, developing data pipelines, and creating proof-of-concept solutions for web-based applications. Collaborated with engineering teams to support AI integration and product enhancement initiatives. Skills: AI Development, Python, Data Pipelines, Prototyping, Web Integration, Machine Learning	

FutureSelf AI – Multi-Agent Decision Intelligence Platform [Code](#)

[Next.js, TypeScript, React, Chrome Extension (MV3), PostgreSQL, Prisma, OpenAI, ChromaDB, Multi-Agent Systems, TailwindCSS] Jun 2026

Designed and developed an AI-powered Chrome Extension and dashboard that intercepts high-impact online decisions across e-commerce, job applications, email communication, and investment platforms. Built a multi-agent decision engine to analyze financial impact, opportunity cost, risk factors, emotional bias, and historical behavior, generating Future Impact Reports with regret probability, confidence scores, and actionable recommendations before users complete critical actions. Implemented Chrome MV3 architecture, Next.js APIs, PostgreSQL database management with Prisma ORM, optional LLM-powered insights, and vector-memory storage using ChromaDB for personalized decision intelligence.

Parking Management System – Full Stack Web Development [Code](#)

[Python, FastAPI, scikit-learn, Docker, GitHub Actions, CI/CD, YAML Configs, Modular ML Pipeline] Jul 2025 – Oct 2025

Designed and developed a comprehensive Parking Management Web Application for IIT Madras MAD-2 course, featuring Flask RESTful backend APIs, VueJS single-page frontend, and SQLite database with Redis caching. Implemented role-based access control for admin (CRUD parking lots/spots, dashboards) and users (register/login, auto-allocate spots, reservations, history/CSV reports), plus Celery background jobs for daily reminders and monthly HTML reports via email/Google Chat.

MLOps Pipeline for ML Model Deployment – MLOps, FastAPI, Docker [Code](#)

[Python, FastAPI, scikit-learn, Docker, GitHub Actions, CI/CD, YAML Configs, Modular ML Pipeline] Jan 2026 – Jan 2026

Designed an end-to-end **MLOps** pipeline covering data ingestion, preprocessing, model training, evaluation, and artifact management with a modular src package structure.

Fresh or Spoiled Fruits Classification (CNN) - Deep Learning [Project Link](#) [Code](#)

[Python, TensorFlow, CNN, Data Augmentation, Hugging Face, Fine tune, Resnet50] Aug 2025 - Aug 2025

Built and trained a deep Convolutional Neural Network (CNN) to classify fresh and spoil images of fruit using the fruit dataset.

Engage2Value: From Clicks to Conversions - Machine Learning [Project Link](#)

[Python, Kaggle, Classification, Pandas, Scikit-learn, Xgboost, Feature Engineering] Aug 2025 - Sep 2025

The competition aims to predict a customer's purchase value using their multi-session digital interactions, including browser, device, source, and location data. Participants must model these behaviors to estimate purchase potential, supporting better marketing and engagement strategies.

Customer Churn Prediction (ANN) - Deep Learning [Project Link](#) [Code](#)

[Python, TensorFlow, Keras, ANN Classification, Pandas, Scikit-learn] Jul 2025 - Jul 2025

Developed end-to-end customer churn prediction systems using Artificial Neural Networks.

Learn and Test Yourself - Gen AI [Project Link](#) [Code](#)

[Python, Streamlit, OpenAI API, LangChain, Parallel Chains] Jun 2025 - Jun 2025

Automatically creates comprehensive notes and quiz questions from any given topic.

JobHunter AI – AI-Powered Job Discovery & Application Automation Platform [Code](#)

[FastAPI, Next.js, TypeScript, PostgreSQL, Elasticsearch, Docker, Kubernetes, Celery, OpenAI, GitHub Actions, CI/CD, ATS Integration] Jun 2026

Designed and developed a full-stack AI-powered job discovery platform that aggregates opportunities from major ATS providers (Greenhouse, Lever, Ashby, Workday, iCIMS, SuccessFactors, Taleo, and others) along with freelance and remote job sources. Built personalized AI ranking pipelines using semantic matching, skill analysis, experience scoring, and location-based recommendations. Implemented resume parsing, ATS-optimized resume generation, cover letter generation, automated job synchronization workflows, Elasticsearch-powered search, Celery-based background processing, PostgreSQL data storage, and containerized deployment using Docker, Kubernetes, and GitHub Actions CI/CD.

Certifications

- **B.sc certificate (3rd year) – IIT Madras**
Issued on: May 2026 [Certificate Link](#)
- **Foundation Certificate (1st Year) - IIT Madras**
Issued on: May 2024 [Certification Link](#)
- **Advance Certificate in Machine Learning and Data Science - IIT Madras**
Issued on: Jul 2025 [Certification Link](#)
- **Diploma in Data Science – IIT Madras**
Issued on: Sep 2025 [Certification Link](#)
- **Diploma in Programming – IIT Madras**
Issued on: Sep 2025 [Certification Link](#)
- **Deep Learning: Beginner to Advanced - Code Basics**
Issued on: Aug 2025 [Certification Link](#)
- **Gen AI to Agentic AI - Code Basics**

Issued on: Aug 2025 [Certification Link](#)

- **Natural Language Processing - Code Basics**

Issued on: Aug 2025 [Certification Link](#)

- **Machine Learning - Code Basics**

Issued on: May 2025 [Certification Link](#)

- **Maths and Stats for AI - Code Basics**

Issued on: Mar 2025 [Certification Link](#)

- **Python - Code Basics**

Issued on: Mar 2025 [Certification Link](#)

- **SQL - Code Basics**

Issued on: Jan 2025 [Certification Link](#)
